The Division of Spill Prevention and Response needs a significant update of the database used to track spills and contaminated sites, as well as document contingency plan review and approval, facility inspections, and drills. The current databases, of which there are 13, have many issues that result in duplicative efforts and unreliable data. This project will provide contractual support to modernize or replace the databases and fix existing bugs. The anticipated result will integrate multiple databases and improve the user interface and reporting features to reduce staff workload. This upgrade will provide for improved reporting and transparency for the public.
